› INFORMATION ABOUT THE EXHIBITION

LOCATION and DATES:

KOMATEK 2026 18th International Construction Machinery, Technology & Equipment Trade Exhibition Will be held at IFM Expo Center - ISTANBUL between 3-6 JUNE 2026.

KOMATEK EXHIBITION PROGRAM

Wednesday	03 June 2026	10:00 AM	Opening Ceremony
Wednesday	03 June 2026	9:30 AM - 7:00 PM	To the guests
Thursday	04 June 2026	09:30 AM - 19:00 PM	To the guests
Friday	05 June 2026	09:30 AM - 19:00 PM	To the guests
Saturday	06 June 2026	09:30 AM - 16:30 PM	To the guests
Saturday	06 June 2026	18:00 PM	Exhibition Closing

› ENTRY AND EXIT TO THE EXHIBITION

Employees and representatives of companies operating in the construction sector will be admitted to the exhibition by obtaining an invitation and registering at the door. Admission to the fair is free. Participants, as well as any companies, individuals, and subcontractors working on behalf of participating firms, will be able to enter, exit, and work in the fairgrounds provided they obtain a badge and register.

› STAND SETUP AND DEPARTURE TIME SCHEDULE

Outdoor Area:

Bringing specialized materials and stand construction companies into the exhibition area	31 May 2026 (Saat 08:00)
Bringing standard materials to the exhibition	01 June 2026 (Saat 08:00)

Indoor Area:

Entry of specialized materials and stand construction companies into the exhibition area	31 May 2026 (Saat 15:00)
Bringing standard materials to the exhibition	01 June 2026 (Saat 08:00)
Exhibition start	03 June 2026 (Saat 10:00)
Exhibition closing	06 June 2026 (Saat 18:00)
Exit of indoor area materials from the exhibition at the latest	07 June 2026 (Saat 12:00)
Exit of outdoor area materials from the exhibition at the latest	07 June 2026 (Saat 12:00)

➤ CUSTOMS CLEARANCE AND HANDLING OPERATIONS

1. The import procedures for materials to be exhibited at the KOMATEK 2026 fair in Turkey will be handled by the participants themselves. If this service is requested to be provided by a company designated by the Organizer, the company information is provided below. The necessary Fair Opening Permit for temporary & permanent import will be obtained by the Organizer & sent to the relevant authorities requested by the participants in accordance with the procedures. Participants bringing such materials must submit their written applications to the Organizer at least one month before the goods arrive at Turkish Customs, specifying the goods & the destination customs office.
2. Ramps and necessary equipment will be provided on-site for unloading and internal transportation purposes and will be available to exhibitors for a fee. Exhibitors must submit their requests for special equipment required for unloading and internal transportation to GRUPTRANS, the authorized company appointed by the Organizer and İFM, in writing at least one week before the arrival of goods at the exhibition site.
3. For reasons of fair traffic safety, unloading, loading, unloading, and internal transportation services within the fairgrounds will only be provided by the authorized company specified by the Organizer (details provided below) for a fee. The prices to be applied are determined by İFM for the first half of 2026 and will be applied to all fairs for a period of time; they are not specific to the KOMATEK Fair.
4. Participants may handle loading, unloading & internal transportation using their own manpower (they may not use any other tools, machinery, or vehicles, even if they own them, for this purpose, except for pallet trucks). They may not obtain these services from any professional other than an authorized transporter within the exhibition area, nor may they outsource these services to another company. GRUPTRANS A.Ş. is the **ONLY OFFICIAL HANDLING** company in the exhibition area. All necessary equipment for handling services (forklifts, cranes, aerial lifts, scissor lifts, etc.) will be provided by GRUPTRANS. The entry of any handling equipment from outside into the exhibition area is strictly prohibited.

➤ GENERAL SERVICE IMPLEMENTATION PRINCIPLES

- Participants are required to submit a detailed written declaration of goods and make a reservation with GRUPTRANS at least 7 business days prior to the exhibition setup. Participants who have made a reservation will have their goods processed without waiting in line if they arrive at the exhibition area at the specified time.
- Specialized equipment, high-tonnage cranes and forklifts, labor, and other additional services must be booked at least 7 business days in advance.
- Participants are responsible for all damages that may arise if there is a discrepancy between the tonnage declared in writing to GRUPTRANS during the booking process and the tonnage used in the operation.
- Cargo arriving at our exhibition area without a reservation is placed in a queue and provided with service as quickly as possible.
- For shipments arriving without a reservation, a 20% surcharge will be applied.
- If logistics companies handle customs clearance themselves, they must deliver the materials to GRUPTRANS at the exhibition area; otherwise, the handling costs will be invoiced to the participating company.
- Prices include VAT. Pricing information will be shared with participants at the beginning of 2026, and you can also contact GRUPTRANS for details.
- Working hours are from 09:00 to 20:00. Work after 20:00 will be subject to a higher rate.

Authorized Transportation Company for the Fair:

GRUPTRANS INTERNATIONAL TRANSPORTATION AND TRADE INC.

› STAND STRUCTURE, ACCESSORIES AND STAND USAGE RULES

GENERAL TERMS AND CONDITIONS:

1. When designing the KOMATEK 2026 Fair layout, the exhibition areas were divided into 5 main groups, taking into account stand sizes and product groups. Accordingly, Halls 2, 4, 7, and 8, with a minimum size of 700 square meters, are reserved for companies exhibiting construction machinery. The stand depth in these halls is 28 meters. Hall 6 will be used by companies exhibiting material handling equipment, with a maximum stand size of 400 square meters. In Hall 3, the largest stand area is limited to 150 square meters, and this area will house manufacturers and sellers of spare parts and components. Hall 5 will feature exhibitions in stands ranging from 50 to 400 square meters, showcasing products that can be defined as construction machinery and technologies. Hall 1 is planned to include companies producing construction machinery, concrete batching plants, concrete mixers, stone crushing and screening plants, and spare parts for these products, as well as companies producing and representing products that are a continuation of those found in Hall 3. In the open area, the minimum stand size will be 200 square meters, and products, construction machinery, and similar items that cannot be displayed in an enclosed space due to their size will be exhibited.
2. As a result of the decision taken by the İFM Management, entry and exit times to the exhibition area are extremely short (the same times apply to all fairs held in this area), and the booth setup and dismantling processes have become extremely critical. In order to avoid any delays in this regard, before detailed implementation rules, we would like to share our general rules and suggestions regarding participation;
 - A) Companies renting stands of 150 square meters or less are required to use standard package stands provided by İnci Fuar Stand, the authorized stand company for the fair. These companies will be exempt from penalties for delays such as stand setup or dismantling. Similarly, other companies whose stand services are provided by İnci Mimarlık will not be subject to delay penalties due to stand dismantling. All participants are responsible for bringing their exhibition materials to and removing them from the area on time.
 - B) Although this will be discussed in detail later, since cutting, nailing, and painting are strictly prohibited on-site during the construction of stands, it is essential to select modular, practical systems that can be assembled and disassembled quickly using bolts during the design and bidding phases.
 - C) The entry process is dedicated to setting up stands on Sunday, May 31st. Exhibition materials must be brought to and placed in the area starting Monday, June 1st. This rule does not apply to stands in the

open area. Participants who need to follow a different program must apply to the Organizer in writing, stating their reasons, and obtain approval.

3. Strict adherence to all rules regarding occupational safety and health in the IFM area is an indispensable requirement. The Occupational Health and Safety Guide, which is part of the agreement signed between IFM and the Organizer and stems from the current Labor and Occupational Safety Laws, and the occupational safety clauses of the aforementioned Agreement are presented as an integral part of the Participant Handbook. Participants are aware of and responsible for the conditions written herein. Within the scope of the agreement between IFM and SADA, the Organizer is held responsible for the actions, causes, or injuries of participants, their employees, subcontractors, and even anyone present on the site on behalf of a participant, as well as for any damage they cause to the site or third parties. Furthermore, as required by the participation agreements signed with the participating companies, all these responsibilities are transferred to the Participant. With this in mind, participants are strongly advised to reflect the responsibilities mentioned in their employment contracts for people, machinery, and companies to the relevant organizations and individuals, and to obtain an INSURANCE POLICY covering employees, products, third parties, and facilities against any negative events that may occur from the entrance of the Fair until leaving the area.
4. Operating machinery, conducting demonstrations (in some special cases, permission may be granted by the organizer for on-site application of machinery and products that do not produce exhaust fumes or noise. Please contact the organizer with detailed explanations), playing music, and engaging in any activities that disturb other participants and visitors are prohibited in the indoor areas of the KOMATEK 2026 Fair. Live music, provided it does not exceed certain sound levels, may be permitted during private meetings, cocktail parties, and receptions. Operating machinery in the open area will be possible within the framework of specific permits, and music may also be played for a limited time and without causing disturbance, with permission from the organizer.
5. Companies that have a stand at the KOMATEK 2026 Fair, and that are not using standard stands but are building or commissioning their own stands, are required to submit their stand projects to the Organizer and obtain written approval. Companies that will build two-story stands or stands higher than 4 meters will also be required to submit the structural design of the stand.
6. Participants and their employees are required to wear identification badges throughout the setup, exhibition, and dismantling processes of the KOMATEK 2026 Fair. Individuals without identification badges will be removed from the area. Identification badges for all individuals performing tasks such as stand setup, transportation, handling, etc., during setup and dismantling, or throughout the fair (in short, everyone who will be actively working inside the stand) will be provided by the IFM Occupational Safety Organization. Participants must submit this information, along with the required documents, to the Organizer by May 1, 2026. Identification badges will be provided by the Organizer to the participating company's own employees (those who will not be actively working at the stand but will be present for supervision and control purposes) and personnel present at the stand throughout the fair. Company employees, including machine operators, assembly workers, participant personnel working at heights, and everyone who will be physically working at the stand, are required to obtain identification badges from the IFM Occupational Safety team.

SPECIAL CONDITIONS:

Open Area Special Conditions:

1. Participants who have rented space in the Open Area will be provided with their stand areas, marked with boundaries, by 8:00 am on 31 May 2026. Participants must have dismantled their stands and vacated the area by 12:00 pm on 7 June 2026.
2. Issuing of Work Permits for the Site: Participants must submit to the IFM Occupational Safety Unit the list of names of their own personnel who will actually be working on site and the personnel of the companies they employ, along with the documents listed below as required by legal regulations. (Documents should be sent to the email address fuur@akbulutakademi.com.tr) After the necessary checks have been carried out, ID badges will be issued to those deemed suitable. Individuals without a badge will not be admitted to the Exhibition Area. Personnel Document List:

- List of All Employees (TC No., Name, Surname, Date of Birth, Gender, Position, Company)
- Temporary Assignment Letter prepared for Personnel to be Working- SGK İşe Giriş Bildirgesi
- Health Fitness Certificate (Approved for Night and Height Work, Approved by Company Doctor)
- Basic Occupational Health and Safety and Working at Height Training Certificate
- Personal Protective Equipment Delivery and Training Record
- Professional Competence Certificate (For Employees Subject to Professional Competence)
- Driving Licence (For Those Who Drive Vehicles)
- Operator Certificate (For Those Who Use Machinery/Tools)

Participants' authorised representatives/officials responsible for supervising and controlling the stand, as well as participating personnel, shall obtain their Participant Badges from the Organiser, which they will use throughout the Fair. Participants are responsible for ensuring that persons working at their stands use the necessary tools, equipment, safety gear, protective materials and clothing.

Participants exhibiting in the open area must submit their stand layout plans (showing the placement of machinery and products, with office and social areas shown as application projects) to the Organiser for approval by 1 May 2026 at the latest. Any changes made after this date must also be submitted to the Organiser for approval by 20 May 2026 under the name 'Change Project'. Those designing double or multi-storey stands/offices in their projects or structures designed to carry loads must also submit the static projects to IFM and the Organiser for approval. In open areas, a wall longer than 5 metres cannot be constructed from the back of the stand towards the corridor between stands with adjacent side walls. Depending on the depth of the stand, after extending 5 metres from the back of the stand to the front of the stand, the remaining space must be arranged with flagpoles, flowers or similar items only to define the area, each not exceeding 2 metres in height and with intervals of no less than 2 metres. For neighbouring stands with more than one side wall (back) & back lengths of less than 20 metres, the 5-metre rule applies to the side walls & these stands must be constructed to a common height of 4 metres. Otherwise, the back of the taller stand will be visible from the rear stand. This situation, which would create a significant visual eyesore for the stand at the back, will not be permitted under any circumstances.

3. Participants shall carry out their installation activities within their own stand boundaries and shall not use neighbouring stands or corridors.
4. Participants with back-to-back stands shall set up their office and hospitality sections on the shared back wall and shall not use walls, panels, stand materials, tent-like materials, or any other materials that would reduce the visibility of another participant from the corridors. The rear-facing surfaces of any panels, stands, visuals, flags, or other materials shared with the neighbouring stand must be plain white and clean. No promotional materials may be used on this surface.
5. Participants with adjacent stands may use flagpoles, potted plants, chains, or similar marking devices on the line separating the two stands, provided that the height of the flagpole does not exceed 1.5 meters and the distance between them is no less than 2 meters. It is strictly forbidden to use any signage, tent, tarpaulin, or promotional material that obscures or distorts the view of the adjacent stand.
6. Electricity for outdoor use will be provided for a fee starting at 9:00 AM on Monday, May 1, 2026. Participants who need to use electricity in their stands before this time may meet their needs using a generator. Since generators are available for rent in the area, no other rented generators will be allowed in the area. Electricity will be delivered to each stand at a single point with the required power and will be connected to the participants' distribution panel. Power supplies taken from walkways and left exposed inside the stand must be protected; otherwise, power will not be turned on. All stand connections require a panel, fuse, and a 30 mA residual current device (RCD). Electricity will not be supplied to connections without a panel, fuse, and RCD, and any existing connections will be switched off. Participants must have their panels inspected by an authorized company, and electricity will be supplied only after approval. Inspection services are subject to a fee. Electrical equipment and work inside the booth, including the distribution panel, will be provided by the participant. Individuals performing electrical work inside the booth must be qualified and possess the documentation specified in Article 2. Panel connections will be made under the supervision of authorized personnel. The participant acknowledges and agrees to be aware of all inspections, controls, and interventions to be carried out by IFM and the Occupational Safety firms appointed by the Organizer, and undertakes and accepts to comply with any warnings issued by these units.
7. Participants exhibiting in open areas will secure any materials to the ground using flanged mounting

brackets and a 30mm drill bit. Fixing by digging, drilling, gluing, etc., is not permitted. If the load is expected to exceed 5 tons per square meter and remain in the same spot for an extended period, a mounting bracket system (wood, concrete, steel sheet, etc.) to distribute the point load must be used. A mounting bracket system is particularly necessary for products supported by tower cranes, plants, and similar fixed points. The organizer and IFM will not be held responsible for ground movements such as sinking or collapse that may occur in the open area. Participants are responsible for the stable placement and display of their products without damaging the ground.

8. Open-air exhibitors may operate, move, and demonstrate their exhibited products within their own booths, provided they do not disturb neighboring booths (through exhaust fumes or noise), and do so in short, repeated intervals. Exhibitors must obtain prior permission from the Organizer for such actions. Any action that causes disturbance to the surrounding area, even with permission, will be stopped by the Organizer.
9. Continuous music broadcasting is prohibited in the exhibition area. Live music performances, provided they do not exceed certain volume levels and are limited in duration, may be permitted for private meetings, cocktail parties, and receptions, subject to approval from the Organizer.
10. Outdoor booth waste should be left in the corridor in front of the booth after the fair closes in the evening, and will be collected from there by the cleaning team. Cleaning inside the booths is the responsibility of the participants.

➤ HALLS NUMBERED 2 - 4 - 7 - 8 SPECIAL CONDITIONS:

1. Stand areas for Participants who have rented space in Halls 1-2-4-8 will be delivered with marked boundaries by 16:00 on 31 May 2026. Participants must have dismantled their stands and vacated the area by 12:00 on 7 June 2026.
2. **Issuing of Field Work Permits:** Participants must submit to the IFM Occupational Safety Unit the list of names of their own personnel who will actually be working in the field and the personnel of the companies they employ, along with the documents listed below as required by law. (Documents should be sent to the email address fuar@akbulutakademi.com.tr) After the necessary checks have been carried out, ID badges will be issued to those deemed suitable. Persons without ID badges will not be admitted to the Exhibition Area.
Personnel Document List:
 - List of All Employees (TC No., Name, Surname, Date of Birth, Gender, Position, Company)
 - Temporary Assignment Letter prepared for Personnel to be Employed
 - SGK Employment Notification
 - Health Fitness Certificate (Approved by Company Doctor for Night and Height Work)
 - Basic Occupational Health and Safety and Working at Height Training Certificate
 - Personal Protective Equipment Delivery and Training Record
 - Professional Competence Certificate (For Employees Subject to Professional Competence)
 - Driving Licence (For Those Who Drive Vehicles)
 - Operator Certificate (For Those Using Machinery/Tools)Participants who are authorised/assigned to supervise and control the stand will obtain their Participant Badge from the Organiser, which they will use throughout the Fair. Participants are responsible for ensuring that persons working at their stands use the necessary tools, equipment, safety gear, protective materials and clothing.
3. Emergency exit doors & fire extinguishers are located in Halls 1-2-4-8. Companies participating in the fair in these halls will be sent the dimensions of these points, precisely aligned with their stands. Participants with emergency exit doors within their stands shall not permit any stand or structure to be erected on the 2-metre section of the wall corresponding to these doors, ensuring that an area of at least 2 metres x 2 metres remains clear in front of the doors. Signs indicating emergency exit doors & directional signs shall not be covered under any circumstances. Similarly, participants with fire extinguishers in their stands shall keep the area in front of these extinguishers clear for a distance of 1 metre, ensuring that no stand or structure obstructs this area. Participants shall demonstrate compliance with these requirements in the stand layout plan submitted to the Organisers for approval. As this rule relates to Occupational Health & Safety regulations, failure to comply may result in the stand being dismantled. It is therefore important that participants ensure compliance by communicating this information to their stand contractors during the design phase.

8. Participants exhibiting in Halls 1-2-4-8 must submit their stand layout plans (showing the placement of machinery & products, with offices and social areas shown as application projects) to the Organiser for approval by 1 May 2026 at the latest. Any changes made after this date must also be submitted to the Organiser for approval by 20 May 2026 under the name 'Change Project'. Those designing double or multi-storey stands/offices in their projects or structures designed to carry loads must also submit the static designs of these structures to IFM and the Organiser for approval.
9. Participants shall carry out their installation activities within their own stand boundaries and shall not use neighbouring stands or corridors.
10. Participants with adjacent stands may use flagpoles, potted plants, or chain-type marking tools on the line separating the two stands, provided that the height does not exceed 1.5 metres and the distance between them is no less than 2 metres. It is strictly prohibited to use any panels, tents, tarpaulins or promotional materials that block the adjacent stand or spoil its appearance. Any backs, promotional materials & similar items that are clearly visible from the adjacent stand but not from one's own stand must have a clean, plain white appearance.
11. Electricity for Halls 1-2-4-8 will be supplied as of 16:00 on Sunday, 31 May 2026. Electricity will be supplied to each stand at the requested power level & will be connected to the participants' distribution panel. Power supplies taken from the walkways and left exposed inside the stand must be protected; otherwise, the power will not be turned on. A panel, fuse and 30 mA residual current device are mandatory for all stand connections. Electricity will not be supplied to connections without a panel, fuse, or residual current device & any open electrical connections will be shut off. Participants must have their panels inspected by an authorised company & electricity will be supplied after approval. Inspection services are subject to a fee. The electrical cable connecting the power supply point to the panel, as well as the distribution panel and other electrical materials and works within the stand, shall be provided by the participant. Persons carrying out electrical work within the stand must be qualified individuals holding the certificates specified in Article 2. Panel connections shall be made under the supervision of authorised persons. The participant acknowledges that they are aware of all inspections, controls and interventions to be carried out by the Occupational Safety companies appointed by IFM and the Organiser, and undertakes and agrees to comply with any warnings issued by these units.
12. During the KOMATEK 2026 Fair, operating machinery and conducting demonstrations within the indoor exhibition areas is prohibited throughout the duration of the Fair (except in certain special cases where the Organiser may grant permission for the on-site application of machinery and products that do not emit exhaust gases or noise). Please apply to the Organiser with detailed explanations), playing music, and engaging in other activities that may disturb other participants and visitors is prohibited. Live music may be permitted during private meetings, cocktail parties, and receptions, provided that the sound level does not exceed a certain threshold. Participants will obtain written permission for such events and music types.
13. The floors of Halls 1, 2, 4 and 8 are concrete. No work that could damage the floor, such as drilling, hammering or embedding, may be carried out in this area. All stands, totems, promotional materials, flagpoles and similar items must be manufactured and used in a way that they are self-supporting. When bringing display products to the stand, unloading and loading must be carried out without damaging the concrete floor. To this end, when unloading palletised machinery, the transport vehicle must enter the stand, the palletised product must be placed on a base (wood, steel sheet, etc.) and moved the shortest possible distance to remain stationary in place. Similarly, when loading, the transport vehicle should be brought close to the palletised product, moved the shortest possible distance, and loaded. The stand owner shall be responsible for any damage to the floor during this process.
14. Participants exhibiting in Halls 2-4-8 must be aware and ensure that any manufacturing work involving cutting, nailing, or painting is strictly prohibited during the construction of their stands. They must also ensure that, during the design and quotation stages, they select systems that are modular, practical, bolted, and can be assembled and disassembled quickly. The maximum height for stands to be erected in this area is 5.80 metres. In addition to submitting and obtaining approval for the project for all stands, a static project must be submitted to and approved by the Organiser for stands that will be erected over 4 metres high and two-storey. Stand builders (stand installation contractors) will be granted access to the site as of 16:00 on Sunday, 31 May 2026, and are expected to complete the transportation and rough construction of their stands by 08:00 on the morning of 1 June 2026. After this time, work within the stand will be permitted until 7:00 AM on Wednesday, 3 June 2026. Stand projects must be submitted to the Organiser and approved by 1 May 2026

at the latest.

15. Participants in the enclosed area may not use the walls, columns or ceilings of the exhibition halls in any way; they may not hang, lean, stick or attach any materials to these surfaces.
16. Should participants leave the stands late and the Organiser be penalised as a result, the aforementioned penalty shall be recovered from the late participant in the same amount. Likewise, participants shall be liable for any material issues such as damage, loss of value, or depletion that may occur to stand materials, exhibition products, or any items within the stand as a result of force majeure measures taken by IFM or the organiser of the next exhibition due to late departure.
17. All stands located in enclosed areas will be inspected by the Istanbul Fair Management (IFM) and the Organiser on the morning of 3 June 2026, when the Fair opens, to ensure compliance with electrical, static and human health measures, and written approval will be obtained. Stands that do not obtain written approval will be subject to financial penalties.

➤ HALLS NUMBERED 5 - 6 SPECIAL CONDITIONS:

1. Stand areas for Participants who have rented space in Halls 3-5 and 6 will be delivered with marked boundaries by 16:00 on 31 May 2026. Participants must have dismantled their stands and vacated the area by 12:00 on 7 June 2026.
2. Issuing of Work Permits for the Site: Participants must submit to the IFM Occupational Safety Unit the names of their own personnel who will actually be working on site and the personnel of the companies they employ, along with the documents listed below as required by law. (Documents should be sent to the email address fuar@akbulutakademi.com.tr) After the necessary checks have been carried out, ID badges will be issued to those deemed suitable. Persons without ID badges will not be admitted to the Exhibition Area. Personnel Document List:
 - List of All Employees (TC No., Name, Surname, Date of Birth, Gender, Position, Company)
 - Temporary Assignment Letter prepared for Personnel to be Employed
 - SGK Employment Notification
 - Health Fitness Certificate (Approved by Company Doctor for Night and Height Work)
 - Basic Occupational Health and Safety and Working at Height Training Certificate
 - Personal Protective Equipment Delivery and Training Record
 - Professional Competence Certificate (For Employees Subject to Professional Competence)
 - Driving Licence (For Those Who Drive Vehicles)
 - Operator Certificate (For Those Who Use Machinery/Tools)Participants who are authorised/assigned to supervise and control the stand will obtain their Participant Badge from the Organiser, which they will use throughout the Fair. Participants are responsible for ensuring that persons working at their stands use the necessary tools, equipment, safety gear, protective materials and clothing.
3. Participants exhibiting in Halls 3-5 and 6 must submit their stand layout plans (showing the placement of machinery and products, with offices and social areas shown as application projects) to the Organiser for approval by 1 May 2026 at the latest. Any changes made after this date must also be submitted to the Organiser for approval by 20 May 2026 under the name 'Change Project'. Projects involving double or multi-storey stands/offices or structures designed to carry loads must also be submitted to IFM and the Organiser for approval. STANDS ARE 'STANDARD STAND MATERIALS' AND COMPANIES THAT HAVE RENTED WITHIN THE STAND ARE EXEMPT FROM THIS CLAUSE.
4. Participants shall carry out their installation activities within their own stand boundaries and shall not use neighbouring stands or corridors.
5. Participants with back-to-back stands shall set up their office and hospitality sections on the shared back wall and shall not use walls, panels, stand materials, tent-like materials, or any other materials that would reduce the visibility of another participant from the corridors. The rear-facing surfaces of any panels, stands, visuals, flags, or other materials shared with the neighbouring stand must be plain white and clean. No promotional materials may be used on this surface.
6. Electricity for Halls 5 and 6 will be supplied from 08:00 on Sunday, 31 May 2026. Electricity will be supplied to each stand at the requested power level and will be connected to the participants' distribution

panel. Power supplies taken from the walkways and left exposed inside the stand must be protected; otherwise, the power will not be turned on. A panel, fuse, and 30 mA residual current device are mandatory for all stand connections. Electricity will not be supplied to connections without a panel, fuse, or residual current device, and any open electricity will be turned off. The electrical cable connecting the power supply point to the panel, as well as the distribution panel and other electrical materials and works within the stand, shall be provided by the participant. Persons carrying out electrical work within the stand must be qualified individuals holding the certificates specified in Article 2. Panel connections shall be made under the supervision of authorised persons. The participant acknowledges that they are aware of all inspections, controls and interventions to be carried out by the Occupational Safety companies appointed by IFM and the Organiser, and undertakes and agrees to comply with any warnings issued by these units.

7. During the KOMATEK 2026 Fair, operating machinery and conducting demonstrations within the indoor exhibition areas is prohibited throughout the duration of the Fair (except in certain special cases where the Organiser may grant permission for the on-site application of machinery and products that do not emit exhaust gases or noise). Please apply to the Organiser with detailed explanations), playing music, and engaging in other activities that may disturb other participants and visitors is prohibited. Live music may be permitted during private meetings, cocktail parties, and receptions, provided that the sound level does not exceed a certain threshold. Participants will obtain written permission for such events and music types.
8. The floors of Halls 3-5 and 6 are concrete. Activities such as drilling, hammering, or embedding that could damage the floor are not permitted in this area. All stands, totems, promotional materials, flagpoles, and similar items must be manufactured and used in a manner that allows them to stand independently. It is essential that the concrete floor is not damaged when bringing exhibition products to the stand, and during unloading and loading. To this end, when unloading palletised machinery, the transport vehicle must enter the stand, the palletised product must be placed on a base (wood, steel sheet, etc.), and it must be moved the shortest possible distance and remain stationary in place. Similarly, when loading, the transport vehicle should be brought close to the palletised product, moved the shortest possible distance, and loaded. The stand owner shall be responsible for any damage to the floor during this process.
9. Participants exhibiting in Halls 3-5 and 6 must be aware and ensure that any manufacturing work involving cutting, nailing, or painting is strictly prohibited during the construction of their stands. They must also ensure that, during the design and quotation stages, they select systems that are modular, practical, bolted together, and can be assembled and disassembled quickly. The maximum height for stands to be erected in this area is 5.80 metres. In addition to submitting and obtaining approval for the project for all stands, a static project must be submitted to and approved by the Organiser for stands that will be erected over 4 metres high and two-storey. Stand builders (stand installation contractors) will be granted access to the site as of 16:00 on Sunday, 31 May 2026, and are expected to complete the transportation and rough construction of their stands by 08:00 on the morning of 1 June 2026. After this time, work within the stand will be permitted until 7:00 AM on Wednesday, 3 June 2026. Stand projects must be submitted to the Organiser and approved by 1 May 2026 at the latest. If more than one company on an island plans to build adjacent special stands, these stands must be of the same height, which has been set at 4 metres. As a special condition, if a company plans to construct a two-storey stand in a contiguous layout, it must submit its project and structural calculations to SADA at least two weeks prior to the exhibition start date, i.e. by 1 April 2026. No construction of stands will be permitted unless previously notified.
10. Participants in the enclosed area may not use the walls, columns or ceilings of the exhibition halls in any way; they may not hang, lean, stick or attach any materials to these surfaces.
11. Should participants leave the stands late and the Organiser be penalised as a result, the aforementioned penalty shall be recovered from the late participant in the same amount. Likewise, participants shall be liable for any material issues such as damage, loss of value or depletion to stand materials, exhibition products or any items within the stand resulting from force majeure measures applied by IFM or the organiser of the next exhibition as a consequence of late departure.
12. All stands located in enclosed areas will be inspected by the Istanbul Fair Centre and the Organiser on the morning of 3 June 2026, when the Fair opens, to ensure compliance with electrical, static and human health measures, and written approval will be obtained. Stands that do not obtain written approval will be subject to financial penalties.

➤ HALLS NUMBERED 1 - 3 SPECIAL CONDITIONS:

All participants in Halls 1-3 have rented space 'INCLUDING STAND', so their stands will be set up by İnci Mimarlık. The stands will consist of standard interlocking stand walls made of aluminium frames covered with MDF panels, measuring 1 metre wide (panel width is 94 cm) and 2.5 metres high. They will include a stand header, floor carpet, electrical connection (220V 5amp) and one 3-way extension cable.

Participants in Halls 1-3 may bring their exhibition materials to the venue from 1 June 2026 at 16:00 onwards, as their stands will have been set up and electrical connections made. **Issuing of Work Permits for the Venue:** Participants must submit to the IFM Occupational Safety Unit a list of the names of their own personnel who will be working at the venue and the personnel of the companies they employ, along with the following documents required by law. (Documents should be sent to the email address fuat@akbulutakademi.com.tr) After the necessary checks have been carried out, ID badges will be issued to those deemed suitable. Persons without ID badges will not be admitted to the Exhibition Area.

Personnel Document List:

- List of All Employees (TC No., Name, Surname, Date of Birth, Gender, Position, Company)
- Temporary Assignment Letter prepared for Personnel to be Employed
- SGK Employment Notification
- Health Fitness Certificate (Approved by Company Doctor for Night and Height Work)
- Basic Occupational Health and Safety and Working at Height Training Certificate
- Personal Protective Equipment Delivery and Training Record
- Professional Competence Certificate (For Employees Subject to Professional Competence)
- Driving Licence (For Those Who Drive Vehicles)
- Operator Certificate (For Those Who Use Machinery/Tools)

As the participant representative/officer responsible for supervising and controlling the stand, the participant personnel will obtain their Participant Badge from the Organiser, which they will use throughout the Fair. Participants are responsible for ensuring that persons working at their stands use the necessary tools, equipment, safety gear, protective materials and clothing. COMPANIES THAT WILL ONLY DISPLAY VISUALS AND ARRANGE THEIR STANDS ARE NOT REQUIRED TO COMPLY WITH THE 'WORK PERMIT' FORMALITIES. THESE TASKS CAN BE PERFORMED WITH THE PARTICIPANT BADGE.

PORTERAGE AND INTERNAL TRANSPORTATION SERVICES MUST BE PROVIDED BY GURUPTRANS.

1. Participants exhibiting in Halls 1-3 must submit their stand layout plans (showing the placement of machinery and products, with offices and social areas shown as application projects) to the Organiser for approval by 1 May 2026 at the latest. Any changes made after this date must also be submitted to the Organiser for approval by 20 May 2026 under the name 'Change Project'. Those designing double or multi-storey stands/offices in their projects or structures designed to carry loads must also submit the static projects to IFM and the Organiser for approval. If more than one company on an island is to build adjacent special stands, the heights of these stands must be the same, and this height has been set at 4 metres. As a special condition, companies planning to build two-storey stands in an adjacent arrangement must submit their project and static calculations to SADA two months before the fair, i.e. by 1 April 2026. No production of stands will be permitted without prior notification.
2. For companies requesting electricity distribution beyond the standard triple socket provided within the stands; electricity will be supplied to each stand at the requested power level at a single point and will be connected to the participant's distribution panel. Power supplies taken from the walkways and left exposed inside the stand must be protected; otherwise, the power will not be turned on. A panel, fuse, and 30 mA residual current device are mandatory for all stand connections. Electricity will not be supplied to connections without a panel, fuse, or residual current device, and any open electricity will be turned off. The electrical cable connecting the power supply point to the panel, as well as the distribution panel and other electrical materials and work inside the stand, shall be provided by the participant. Persons performing electrical work inside the stand must be qualified individuals with the documentation specified in Article 2. Panel connections shall be made under the supervision of authorised persons. The participant acknowledges that they are aware of all inspections, controls and interventions to be carried out by IFM and the Organiser's appointed Occupational Safety companies, and undertakes and agrees to comply with any warnings issued by these units. Companies granted the right to construct their own stands are subject to the provisions of Article 6 of the Electrical Regulations in Halls 5-6.

3. Participants shall carry out their installation activities within their own stand boundaries and shall not use neighbouring stands or corridors.
4. During the KOMATEK 2026 Fair, operating machinery and conducting demonstrations within the enclosed areas of the Fairgrounds is prohibited. However, in certain special circumstances, the Organiser may grant permission for the on-site application of machinery and products that do not emit exhaust gases or noise. Please apply to the Organiser with detailed explanations), playing music, and engaging in other activities that may disturb other participants and visitors is prohibited. Live music may be permitted during private meetings, cocktail parties, and receptions, provided that the sound level does not exceed a certain threshold. Participants will obtain written permission for such events and music types.
5. The floors of Halls 5 and 6 are concrete. Activities such as drilling, hammering, or embedding that could damage the floor are not permitted in this area. All stands, totems, promotional materials, flagpoles, and similar items must be manufactured and used in a manner that allows them to be self-supporting. It is essential that the concrete floor is not damaged when bringing exhibition products to the stand, and during unloading and loading. To this end, when unloading palletised machinery, the transport vehicle must enter the stand, the palletised product must be placed on a base (wood, steel sheet, etc.), and it must be moved the shortest possible distance and remain stationary in place. Similarly, when loading, the transport vehicle should be brought close to the palletised product, moved the shortest possible distance, and loaded. The stand owner shall be responsible for any damage to the floor during this process.
6. Participants in the enclosed area may not use the walls, columns or ceilings of the exhibition halls in any way; they may not hang, lean, stick or attach any materials to these surfaces.
7. Should participants leave the stands late and the Organiser be penalised as a result, the aforementioned penalty shall be recovered from the late participant in the same amount. Likewise, participants shall be liable for any material issues such as damage, loss of value, or depletion that may occur to stand materials, exhibition products, or any items within the stand as a result of force majeure measures applied by IFM or the organiser of the next exhibition due to late departure.
8. All stands located in enclosed areas will be inspected by the Istanbul Fair Centre and the Organiser on the morning of 1 June 2026, when the Fair opens, to ensure compliance with electrical, static and human health measures, and written approval will be obtained. Stands that do not obtain written approval will be subject to financial penalties.

➤ **STAND FURNITURE and ACCESSORIES**

Stand accessories, furniture and carpets can be rented from the official stand company of the fair, İNCİ MİMARLIK. The list and prices of furniture and materials available for rental can be ordered from the companies' own websites or by contacting them. The Organiser shall not bear any authority or responsibility in these rental transactions. The authorised person and contact details for the KOMATEK exhibition at the İnci Mimarlık stand company are as follows:

Esra Turgut

GSM: +90 545 799 47 58 – +90 212 886 59 90

Address: Osmangazi Mah. 3142. Sok. No:7 34522 Esenyurt/İstanbul/TURKEY

E-mail: info@incimimarlik.com / esra@incimimarlik.com

➤ **CUSTOM EXHIBITION STAND DESIGNS**

Should participants request a custom stand design and construction, the names of the company/individual responsible for the architectural design and execution of these works shall be notified to the Organiser at least 30 days prior to the exhibition opening date.

➤ **ELECTRICITY and LIGHTING**

Participants shall request electricity from the Organiser for use from the time of entry to the exhibition area until departure, and these requests shall be met as described below.

Stands shall be connected to the power supply in increments of 5 kW and 1 kW, subject to an electrical installation fee. **ELECTRICITY CONNECTION & CONSUMPTION FEES WILL BE DETERMINED BY IFM AT THE BEGINNING OF 2026 AND ANNOUNCED TO PARTICIPANTS.** This service must also be requested by completing form number 4. **If the request is not made in writing and the fee is not paid in accordance with the procedure, the wiring will not be installed at the stands.** If companies are found to be using more than the power provided, the stand's electricity will be cut off and can only be restored after the actual request is made in writing and the fee is paid. **In such cases and if the request is not made on time, the fee will be collected with a 50% penalty.**

Electricity will be supplied to each stand at the requested power level at a single point and will be connected to the participants' distribution panel. Power supplies taken from the walkways and left exposed inside the stand must be protected; otherwise, the power will not be turned on. A panel, fuse and 30 mA residual current device are mandatory for all stand connections. Connections without a panel, fuse, or residual current device will not be supplied with electricity, and any open electrical connections will be shut off.

All electrical materials and work within the stand, including the distribution panel, shall be provided by the participant. Persons undertaking electrical work within the stand must be qualified individuals holding the documentation specified in the Occupational Safety Regulations. Panel connections shall be made under the supervision of authorised persons. The participant acknowledges that they are aware of all inspections, controls and interventions to be carried out by IFM and the Organiser's appointed Occupational Safety companies, and undertakes and agrees to comply with any warnings issued by these units.

Electrical distribution projects for stands must be submitted to the Organisers by 15 May 2026, and compliance with the project specifications will be verified. Furthermore, on the morning of 3 June 2026, when the Fair opens, all stands will be inspected to ensure they comply with the static, application, and ELECTRICAL project specifications and meet safety requirements, after which a written stand opening permit will be issued. Participants shall have their panels inspected by the Authorised Company, and electricity will be supplied after approval. Inspection services are subject to a fee.

It is strictly prohibited for any other company or individual in the exhibition area to engage in electrical work or interfere with the electrical installations outside the stand allocated to the Participants.

Participants shall be held directly responsible for any such behaviour by persons working for them, including staff, subcontractors or any other individuals.

No lighting will be provided in the open area outside the stands. In the enclosed area, however, local lighting fixtures for use day and night will be operational.

➤ **LIABILITIES and INSURANCE**

The Organisers shall not be held liable for any loss, damage or reduction in value that may occur during the exhibition, nor for any accident that may befall the participants' staff, relatives or visitors. Participants with machinery and equipment operating with flammable fuel or containing flammable substances within their stands must have a fire extinguisher and stand personnel must be trained in its use. Participants are advised to insure their own materials against all risks. Participants shall be liable for any damage caused to third parties by themselves, their employees or contractors. All participants agree not to hold the Organisers liable for any damage, defect or claim that may arise as a result of their participation in this exhibition. It is recommended that participants include a clause stating that the Organisers are also considered third-party insured parties if participants insure their goods and personnel at the exhibition.

➤ OCCUPATIONAL SAFETY

The Participant shall only employ insured personnel in the Leased Area and shall be responsible for ensuring that its personnel work in safety and security in accordance with the legal regulations, taking all necessary measures, providing protective equipment and distributing it to its personnel, selecting and training its own personnel or subcontractor personnel in accordance with the relevant regulations, supervising them and monitoring their work. Any occupational safety measures specified by IFM employees and the occupational health and safety company providing services shall be implemented immediately by the Lessee.

The Participant shall prepare a risk assessment for the Leased Area in accordance with the Occupational Health and Safety Law No. 6331, without the need for a separate request from the IFM, prepare assignment letters for all personnel to be employed for OHS activities, and submit to SADA, no later than one month prior to the organisation date, a list of names of subcontractor personnel, employment insurance declarations for the persons to be employed, and all other documents, including certificates related to occupational health and safety training and professional competency training documents, as required under Law No. 6331. and to comply with the Occupational Health and Safety Guide attached to this contract. The required documents are shared in the Occupational Health and Safety Guide, and neither IFM nor SADA shall be liable for any damages that may arise from employees not being allowed into the exhibition setup and dismantling area due to missing documents. In this context, SADA has the authority to inspect the Participant in accordance with the Occupational Health and Safety Law No. 6331 and other relevant legislation. However, this inspection authority cannot be considered an obligation on the part of SADA.

SADA will check the documents relating to the personnel that the Participant will employ in the Rented Area, and if deemed appropriate, photo ID cards will be issued to the personnel. Personnel without photo ID cards will not be admitted to the Rented Area.

The Participant shall be solely responsible for ensuring that the personnel and workers employed during the term of the contract comply with the workplace safety rules established by SADA regarding occupational health and safety, as well as with the applicable regulations, orders and instructions. The participant, staff and workers shall be solely and personally liable for any damage or loss that may occur to any vehicle or property as a result of their failure to comply with established rules on occupational health, occupational safety, workplace safety and administrative matters, and for any other actions they may take. In the event of any accident or work-related accident occurring during the performance of the work covered by the contract or involving the Participant's personnel and/or subcontractor personnel in the Leased Area, resulting in damage to the Participant's personnel (subcontractor personnel) or the personnel of IDTM providing services on behalf of SADA A.Ş. or third parties, the Participant shall be personally and financially liable for any claims arising from such an incident, including death, injury, illness, incapacity to work, loss of support, and similar claims, as well as for any material and moral damages, and shall be subject to judicial, administrative, and criminal liability. The Participant shall be liable to compensate for such damages.

In the event of any work accident that may occur as a result of the negligence and/or carelessness of the Participant's personnel and/or subcontractor personnel, all medical expenses (hospital, doctor, surgery, ambulance and medication) shall be borne by the Participant. SADA reserves the right to seek recourse from the Participant for any penalties, compensation, and other financial obligations it may be required to pay in this regard, and the Participant accepts SADA's right of recourse in this matter.

If SADA is required to make any payment to the Participant's personnel or subcontractor personnel or third parties based on the obligations arising from the Labour Law or other relevant legislation, If SADA is held liable, either jointly with the Participant or directly, and is required to make any

payment to the Participant's personnel, subcontractor personnel, or third parties, the Participant shall reimburse SADA for its loss, without the need for any further notice, in cash and in full, together with interest at a monthly rate of 10% (ten per cent) accruing from the date of payment.

The Participant shall be obliged to take all necessary measures to ensure that the workers and subcontracted workers employed in the leased area work in safety and security, and to select, supervise and employ workers in accordance with the relevant legislation. The Participant is obliged to take all necessary safety measures within the framework of the relevant legislation to prevent any accidents involving the workers and other technical personnel it employs in the Leased Area covered by the contract, to provide workers with protective equipment, and to continuously monitor whether this equipment is being used during working hours.

In the event that the Participant acts in breach of any of its obligations under this clause, IFM shall have the right to terminate this agreement immediately. In such a case, all rent paid by the Participant shall be recorded as a penalty clause. The Participant hereby accepts this provision in advance.

Furthermore, SADA shall have the right to refuse entry to the Leased Area to the Participant and/or subcontractor personnel who have not been duly notified. The Participant shall not be entitled to claim any damages arising from this provision, nor shall they be entitled to claim any compensation under any circumstances.

Without being limited to those listed in this clause, the Tenant must take the following matters into consideration:

Ensure that all documents related to occupational health and safety specified in this agreement and in the laws are submitted to SADA for both themselves, the exhibition participant, and the companies that will carry out the installation and dismantling.

Supplying SADA with the documents and information required from participating companies during the pre-fair setup and post-fair dismantling stages

To monitor whether participants and subcontractors carrying out installation work comply with this rental agreement, the law, and Occupational Health and Safety regulations

To ensure that OHS services are properly performed throughout all processes within the rented area, including installation, the exhibition period, and dismantling, and to supervise employees

To take all necessary measures requested by SADA to facilitate the work of the OHS expert in the field

To ensure that persons not involved in the work carried out in the Leased Area are not admitted

To provide workers and personnel working in the Leased Area during the term of the agreement with coloured clothing/vests, etc., according to their profession, and to take and develop such and similar facilitating measures

During the installation, operation, and dismantling of the exhibition stand, all modifications and maintenance work shall be carried out in compliance with occupational safety regulations. Necessary precautions shall be taken for specific risks associated with activities such as working at heights or with electricity. Any occupational safety measures specified by SADA employees and the occupational health and safety company providing services shall be implemented immediately by the Participant. The Participant shall be liable for all damages arising from matters covered by the Occupational Health and Safety Law No. 6331 within the scope of this Rental Agreement.

In the event that it is determined that the Tenant has failed to comply with the obligations set forth in this agreement and/or that sufficient measures have not been taken in terms of occupational health and safety, SADA shall report the violation to the Turkish Ministry of Family and Social Services and shall close the Leased Area to the Participant's use. In such a case, the Participant shall not be entitled to claim any compensation and shall be liable to compensate SADA for all damages incurred.

› SECURITY SERVICES

Throughout the contract period, general security services will be provided by a company authorised by the Istanbul Fair Centre (IFM) and will be assigned in accordance with the standard number of personnel determined by the IFM.

Special security services for stands will be provided by the IFM at the request of the stand owner, subject to a minimum of 8 (eight) hours being provided, in return for payment. IFM or the Organiser shall not be held liable for any adverse events (theft, damage to property, breakage, spillage) occurring at stands where special security services are not provided during the exhibition set-up and dismantling phases and during the exhibition opening hours. IFM's liability under the special security service is limited to its own fault. The Organiser shall not be liable for any damages arising from the tenant or their staff failing to comply with the warnings communicated to them as part of the security measures.

› ENTRY CARDS (ID CARDS)

Participants shall provide the Organiser with a list of staff members who will be present at their stands throughout the exhibition. An Entry Card will be issued in the name of each person on this list, allowing them free access to all areas of the exhibition. (Opening ceremony, exhibition area, etc.) The names of stand personnel will be entered by companies into the Badge Form on the Participant Portal, accessible via the Exhibition Website (komatekfuar.com), and personnel badges will be prepared based on this information. The use of these badges is mandatory when entering and exiting the exhibition area.

› EXHIBITION INVITATIONS

Participants will be given a certain number of **Exhibition Entry Invitations** to give to individuals and organisations they wish to invite to the exhibition. Participants can obtain their invitations by informing the Organiser of the number of invitations they require by 1 May 2026 at the latest. Invitation requests will also be sent to the Organiser via the Participant Portal.

VIP BADGES: Two types of VIP badges will be issued at the KOMATEK 2026 Fair.

Protocol will be accepted; persons holding positions of General Manager, Department Head, Undersecretary, Deputy Minister and higher in official institutions and organisations will be invited to the Fair by means of VIP Protocol cards created by SADA and sent to their addresses. Other persons to be added to this list may be requested by participating companies from the Organiser by completing the VIP Protocol Information Form available on the Participant Portal.

Information regarding individuals not included in the Protocol but deemed important by the Participants will be requested by the Participant via the Participant Portal by completing the necessary form, and these badge cards will be sent to the requesting Participant for distribution.

› EXHIBITION CATALOGUE

An official exhibition catalogue will be prepared for participants and visitors. This catalogue will also be distributed to government departments, commercial organisations, chambers of commerce, the press, foreign embassies and libraries.

The catalogue will contain the following information: General information about the exhibition; List and details of participants; A 'Buying Guide' based on products; Advertisements.

Stand cleaning; authorised company and services to be provided; During the contract period, the cleaning of exhibition halls, foyers, other common areas and outdoor areas shall be carried out by the Istanbul Fair Centre (IFM) or a company authorised by IFM, in accordance with the standard number of personnel determined by IFM. Stand interior cleaning (special stand cleaning) services will be provided by the Istanbul Fair Centre or a company authorised by the Istanbul Fair Centre for a fee, if requested by the Participant.

➤ DISPOSAL OF RUBBISH AND RUBBLE

During the exhibition period (set-up, exhibition period, dismantling and cleaning), the disposal of rubbish and debris accumulated in the exhibition halls, common areas and outdoor areas (including household waste) will be carried out by the Istanbul Fair Centre.

➤ TECHNICAL DETAILS OF THE EXHIBITION AREA

The exhibition area consists of two sections: indoor and outdoor. The indoor area has a ceiling height of 9 metres and is a prefabricated concrete structure with a concrete floor. Written permission must be obtained from the Organiser for equipment exceeding 6 metres in height. Stands and corridors rented by the Organiser as part of the Stand Package will be delivered with rip carpet laid over the concrete floor.

The height of the stands to be set up in this exhibition hall shall not exceed 5.80 m. Two-storey stand installations with a height of 4.00 m and above shall only be possible with the written approval of the IDTM technical and Occupational Health and Safety (OHS) teams (on behalf of IFM Fuarçılık A.Ş.), subject to a static report and project. The weight of products (machinery, vehicles) to be exhibited in this area shall not exceed 2,250 kg (two thousand two hundred and fifty kilograms) per square metre. If the weight of the products to be exhibited exceeds 2,250 kg (two thousand two hundred and fifty kilograms) per square metre, permission will be granted subject to the approval of the IFM Technical Directorate following the implementation of measures to ensure the weight is evenly distributed.

The open area floor is concrete/asphalt. Participants shall return the asphalt and concrete floor in the same sound and proper condition as they received it.

ADVERTISING OPPORTUNITIES AT THE EXHIBITION CENTRE

You can obtain pricing and information support from SADA regarding transportation options to the Istanbul Exhibition Centre (IFM) in February 2026, with digital displays and totems within the exhibition area and totems around the exhibition area.

EXHIBITION DEMO AREA USE AND RENTAL DETAILS

An area has been allocated at KOMATEK 2026 for the demonstration specified in the project to be carried out in the open space. For rules and pricing regarding the use of this area, please contact SADA. You can also find all the necessary details in the demonstration rules and pricing document.
